PLAN FOR INTERSTATE DISTRIBUTION
OF POLIOMYELITIS VACCINE

NATIONAL ADVISORY COMMITTEE

STEP 1

Establishes and from time to time broadens the priority group to receive vaccine

PUBLIC HEALTH SERVICE

STEP 2

Determines allocation of vaccine to each state for priority group

STEP 4

Advises manufacturers of vaccine to be sold in each state to public agencies and other purchasers

STEP 6

Advises states of vaccine available; advises manufacturers to fill orders in accordance with information previously furnished showing percentage distribution between public agencies and other purchasers, or makes such adjustments in distribution percentages as are necessary

MANUFACTURERS

STEP 5

Advise PHS of vaccine ready for shipment

STEP 8

Solicits orders or fills orders in accordance with instructions in step 6.

STEP 9

Provides states with copies of invoices, and summarizes for PHS the amount of vaccine shipped to each state

STATES

STEP 3

Advises PHS of percentage of vaccine to be sold to public agencies and to other purchasers (revises this percentage distribution as necessary)

STEP 7

Advises purchasers that vaccine is available from given manufacturer, and approves public agency orders to be placed
